Outline

- Point in Time Recovery
- Frequency of Backup
- Location of Backup
- Copy Database From One Server to Another
- Best Time of the Day for Backup and Restore

Point in Time Recovery

Q: I just deleted a row from a table, can I reverse my latest action?

A: Yes, with Point In Time Recovery

- Point-in-Time Recovery Using Event Positions
- Point-in-Time Recovery Using Event Times

Scenario Point in Time Recovery

Scenario Point in Time Recovery

Scenario Point in Time Recovery

Frequency of Backup

Q: What should be the frequency of my backup?

A: There is no right or wrong answer.

Goal: Data Safety

Recommendation: Take frequent backup at regular interval

Location of Backup

Q: What is the best option to store database backup?

A: There are multiple options to store your backup

Recommendation:

- ❑ Google Drive
- ❑ Dropbox
- ❑ Amazon Simple Storage Service (S3)
- ❑ Remote Computers (FTP)

Copy Database from One Server to Another

Q: What is the best method to copy Database from one server to another server?

A:

Method 1: mysqldump (database level operation)

Recommend

Run the following commands on the database server

shell> mysqladmin -h '*other_hostname*' create *db_name*

shell> mysqldump *db_name* | mysql -h '*other_hostname*' *db_name*

Method 2: mysqlimport (table level operation)

Module 2

Best Time of the Day for Backup and Restore

Q: What is the best time of the day for backup and restore operation?

A:

- Nightly maintenance process
- Low database activity

Learned So Far

What we have learned so far –

Database Backup with mysqldump

Database Restore with mysql

Export Import with MySQL Workbench

Point in Time Recovery

Best Practices

What Next?

What should you do next –

Try out demos from this course

Take backup of your database

Validate your backup by restoring it on
the development server

Learn Advanced Concepts

MySQL Enterprise Edition
